KITCHENS + JOINERY

FOUND Kitchens + Joinery can design, craft and install your dream kitchen. We have a number of approaches to choose from to help simplify the creative process.

We work in 2D line drawings or fully rendered 3D models. We offer different design service levels depending on what is important for you.

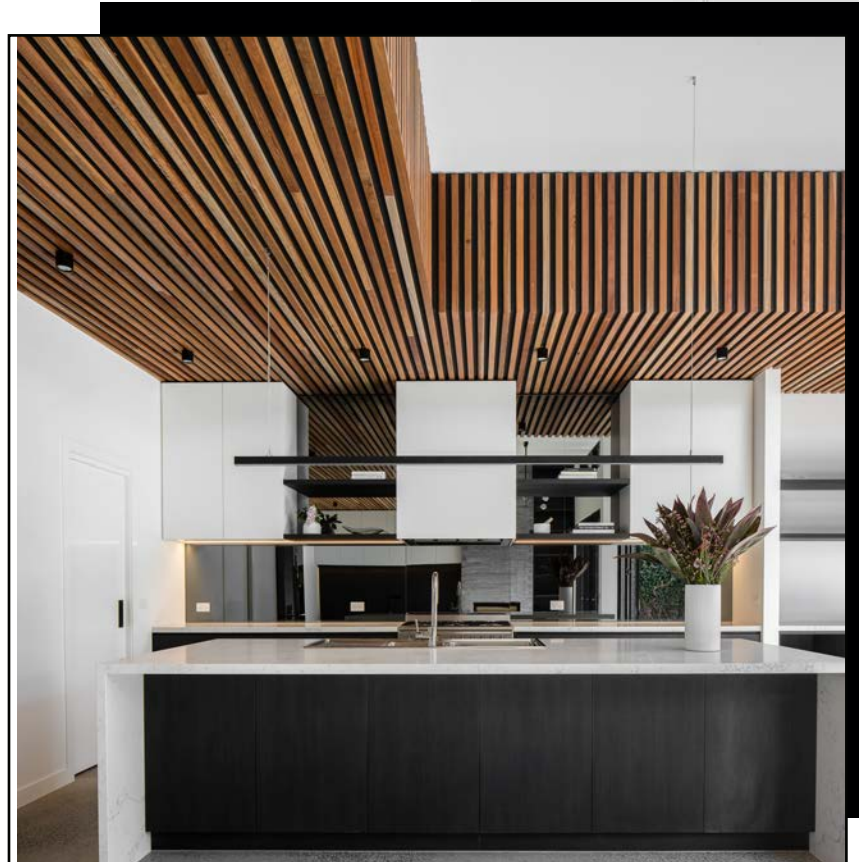

1. Basic

Spend time with our designer to explore ideas and receive the attention to details that ensure you are getting the best possible layout. Simple joinery drawings are available to view in the showroom.

2. Premium

Designer consultation in our showroom or home. Advice and selection of joinery material and hardware is provided with a complete set of joinery documentation.

3. Comprehensive

Enjoy multiple face to face meetings in the showroom or home. A complete set of joinery documents including fully rendered 3D models are provided.

Our Comprehensive Design Service includes fixture, fitting and equipment selection (F,F&E) advice for appliances, tapware, tiles, flooring, paint and more.

F,F&E can be added as extra to both our Basic and Premium Design Services offers.
